## ARTISTS IN ACTION/ VOID PEOPLE

The VOID PEOPLE concept suggests that "All humans exist with a hidden sense of unfulfilment. We crave and seek for an escape from this sense of emptiness by endlessly attempting to fill the void with externalities."

The objective of VOID PEOPLE is to kickstart conversations about mental health, raise awareness around how depression is perceived, and to erase negative stigma that is attached to mental health challenges. Which will lead us towards more positive dialogues, a stronger sense of community, and a more genuine human connection.
